Subject: LIMS Team

I have been invited to make a presentation about the status and scope of the LIMS at an R&D/IS meeting next week. Bob Ferguson asked me to make a short presentation and leave lots of time for questions. It seems that there is some interest in expanding the scope of the LIMS.

If there are no objections, we can cancel today's meeting. We should plan on meeting next week to discuss the outcomes from the 2/11 presentation.
